

**“When you feel
the fine grain, you’ll
know why this is my personal favorite wood.”**

George Goodwin

“Rare wood and fine millwork for elegant expressions of your design...”

Like our River-recovered Heart Pine, we are the only company to bring you River-recovered Heart Cypress. When you “experience” this wood, you will understand why it was a favorite of Frank Lloyd Wright. Heart Cypress, also known as “Antique Tidewater Cypress,” is exceptionally fine-grained and exudes a warm golden-brown color.

It comes in at least two different grain patterns: Select with subtle swirls; or Vertical with a straight grain. We often can provide more unusual grains and textures such as Birdseye Heart Cypress or Pecky Heart Cypress.

Heart Cypress is perfect for just about any building need you may have . . . windows, doors, cabinets, furniture, flooring, even exterior siding. Come visit our showroom and see for yourself!

Fine architectural millwork is like a frame that outlines a work of art...

Mouldings today are often plain wood strips to hide the gaps, compared to the timeless designs of architectural millwork from the last century. Goodwin has searched out and captured the romance of this lost artwork, to provide you with classic wood mouldings — or elegant new styles of your own design.

All of our mouldings come with sand-free millwork, free of charge. Knives can be ground on-site to make the pattern of your choice and millwork is produced in quality clear Heart Pine, Heart Cypress and a host of other sustainably harvested hardwoods. We support Sustainable Forestry by offering you Certified Timber Products. If your project requires certified wood, let us help you find just the right choice.

Above: Heart Cypress window trim is the consummate companion for Heart Pine floors.

Middle: Millwork like ours requires skill, precision tools, and a passion for wood.

Far Left: Fine furniture in fine antique woods can create your family heirloom.
